SUMMARY

Highly motivated computer science graduate with a passion for full-stack Java development. Strong knowledge of Java, front-end technologies, and back-end frameworks. Seeking an opportunity to contribute technical expertise to a dynamic organization.

EDUCATION

Bachelor in mechanical engineering   May '23

New horizon college of engineering   Bangalore, IN

- **CGPA:** 7.07/10.0

Class XII   Mar '19

Alva's Pu College   Mudbidri, IN

- **Percentage:** 80%

Class X   Apr '17

Narayana E-techno School   Bangalore, IN

- **CGPA:** 9.2/10

KEY SKILLS

• **Software Development • Web Application Development • Software Debugging & Testing**

TECHNICAL SKILLS

- **Languages:** HTML5, CSS3, Javascript, C ,C++, Java, Python
- **Frameworks & Libraries:** Angular JS, ReactJS, NodeJS, Express, Spring Boot
- **Databases:** MySQL, MongoDB, SQL Server
- **Operating Systems:** Windows, Linux

CERTIFICATION

Full Stack Java Developer Certification | Simplilearn   Present

- Extensive training in full-stack Java development, covering Git, SQL, Core Java, Spring, HTML, CSS, JavaScript, React.JS, and MongoDB. Proficient in building end-to-end web applications using a comprehensive stack of technologies

PROJECTS

Food-box   Apr '23 - Jun '23

Tech Stack: MySQL, Java, Node.js, Angular, Javascript, GitHub

- **Developed** an Online food delivery web application that allows users to order food items from various cuisines
- **Implemented** features such as user registration, login for users and administrators, a dashboard, product search, cart management, payment gateway integration, and an order summary confirmation page

MyMoviePlan   May '23 - Jul '23

Tech Stack: MySQL, Java, Node.js, Angular, Javascript, GitHub

- **Developed** a dynamic and responsive web application for online movie ticket booking
- **Implemented** features such as registration, login, payment gateway integration, searching, filtering, sorting, and compatibility with various devices

Medicare   Apr '23 - Jun '23

Tech Stack: MySQL, Java, Node.js, Angular, Javascript, GitHub

- **Developed** a dynamic Java e-healthcare web application for seamless medicine ordering
- **included** features such as registration, login, payment gateway integration, advanced search,filtering, and sorting
- **Implemented** responsive design, ensuring compatibility across devices for enhancing user experience

FlyAway   May '23 - Jul '23

Tech Stack: MySQL, Java, Node.js, Angular, Javascript, GitHub

- **Developed** a custom ticket-booking portal catering to flight reservations.
- **Created** a secure admin login and curated destinations, airlines, and flight lists
- **applied** responsive design and denoted source, destination, airline, and ticket price

ADDITIONAL INFORMATION

- **Hobbies & Interests:** Photography, Reading Manga
- **Languages**: English, Hindi, Telugu.
